Additional Services

Microchip - A tiny microchip is injected between the shoulder blades quickly and safely. This provides permanent positive identification which can not be lost, altered or intentionally removed.

I would like to have my pet microchipped. The additional cost is $55. Yes No

Nail Trim - Some pets find nail trims to be stressful. Having this procedure done while under anesthesia reduces both pet and client stress.

I would like my pet to have a toenail trim. The additional cost is $20. Yes No

Fluoride Treatment -

I would like my pet to have an oral Fluoride treatment applied for $5. Yes No

Dental X-Rays - An effective way to identify dental problems such as extra teeth, cysts, infection or decay.

I would like my pet to have full mouth Dental X-Rays. The extra charge is $100. Yes No

Laser Therapy - Safe non-invasive treatment that reduces pain and swelling and speeds healing.

I would like my pet to have Laser Therapy for an additional charge of $15. Yes No

Surgical Release

I understand I am requesting a general anesthetic procedure for my pet. Although this is a common procedure in animals and humans, it is a serious procedure. I acknowledge that risk can be minimized, but some risk still exists. I understand that these options are a good idea and recommended by Highland Park Animal Hospital and its agents, but that they DO add additional cost to the procedure.
